

# OPEN URBAN PLATFORM

Connection program

## Getting started with the Open Urban Platform

The digital transformation is in full swing and government agencies are already working on this. With the Open Urban Platform, everyone can use the power of open and combined data in a safe and responsible manner.

The Open Urban Platform makes it possible to combine all kinds of data and apps from different sources and suppliers. This creates a scalable and flexible ecosystem of data and services that increases the possibilities for innovation and reduces vendor lock-in. Important preconditions for such an ecosystem are of course that everyone can use it in a safe and ethical manner.

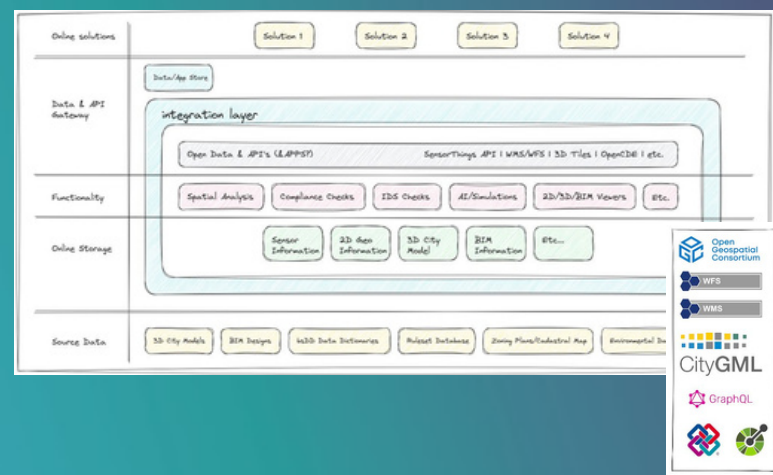

We offer the Open Urban Platform connection program and you can register for it now!

You will work together with other public organizations. You will think about important themes such as Build & Architecture, Governance & Ethics and Organizational Design, but you will also work on building your own Open Urban Platform.

**Join!**

Participating is very easy. Call or email Bas Hoorn:

06- 46 90 97 84  
bas@futureinsight.nl

**Goal:** Get started with the Open Urban Platform

**Costs:** 50.000 EUR

**For whom:** All government agencies

**Result:** Building your own Open Urban Platform by connecting to the Open Urban Platform. With attention to important conditions such as organizational design, governance and architecture.
